

**Certified
Instruction.
Hands-on
Training.
In a Real Studio.**

Cue Studios has been producing outstanding recordings for over a quarter century. We're proud of our satisfied clients, numerous gold and platinum records, state-of-the-art equipment, and professionally-designed acoustics. Our greatest achievement, however, has been the CENTER FOR AUDIO ENGINEERING (CSCAE) — where students can learn the art of sound from engineers with time-tested track records.

The Hands-on Difference. Sure, anyone can google answers to standard audio engineering questions these days — but where do you go to learn the finest points from the experts themselves? CSCAE! You'll receive professional instruction, where you're the one to twist knobs and push buttons on all the latest gear. You'll track, mix and master actual recordings for artists in our studios. At each step in the process, your instructor guides and trains you.

Cue's Appointments. 6 studios, 5 control rooms, 4 lounge areas, Wifi, Pro Tools HD systems, hundreds of "plug-ins" from recognized names like SSL, Neve, API, Waves, and Pultec. Take advantage of our private "Learning Lab" to practice your digital workstation skills and master the latest software. Our course coordinator is ready to assist you with accommodations, internships, payment options, and more.

**An Outstanding
LEARNING
Environment**

CSCAE: Leading Destination for **AUDIO ENGINEERING STUDENTS** Master the Art of Sound — Fast Forward Your Audio Career

All Classrooms Should Be This Much Fun.

The environment in which you learn plays an important role in the quality of your education. CSCAE's professionally-designed studios have fostered a tradition of gold and platinum records. Superior acoustics, cutting-edge digital technology, vintage tube/analog gear, and some of the most talented engineers in the industry ensure the quality foundation you should demand from your educational investment. Small class settings or one-on-one instruction encourage active learning. Certificates and internships are awarded with successful program completion. Students will network with known producers, active recording artists and Cue's personnel. Our enthusiastic staff is eager to exceed expectations and cultivate your audio career. Schedule your school/studio tour for a closer review of CSCAE today.
